NT-Dental and INFINIDENT Solutions announce partnership / DIM-Analog® for 3D printed models and the NT-Dental model now available at INFINIDENT Solutions

Already since 2017 INFINIDENT has been successfully offering dental models manufactured using SLA/DLP processes as one of the pioneers. Now INFINIDENT has once again expanded its existing model portfolio and is offering implant models with built-in DIM-Analog® from NT-Dental as well as the purchase of the DIM-Analog® for in-house model manufacturing via web order.

Darmstadt, 17 May 2021. INFINIDENT Solutions, the industry- and laboratory-independent CAD/CAM digital service partner for practice and dental laboratories in Europe and NT-Dental, a global implant technology company, announce a comprehensive distribution partnership.

INFINIDENT Solutions will work together with NT-Dental to enable dental and practice laboratories in Europe with quick and convenient access to the DIM*-Analog® (*Digital Implant Model Analog) for printed models. The products are available immediately via the INFINIDENT Solutions webshop.

Oliver Klein, Chief Sales Officer at NT-Dental, comments: "We are delighted to welcome INFINIDENT Solutions as another strong partner. INFINIDENT is well known for its experience with Dentsply Sirona software and will help us make the DIM-Analog® accessible to more user groups. Offering DIM-Analogs and the DIM-Analog® Model is just the first step and we look forward to offering more solutions together in the near future."

For customers of INFINIDENT Solutions, the partnership with NT-Dental will open up the possibility of purchasing the appropriate DIM-Analog® for their own model printing directly in the INFINIDENT webshop or order a high-quality, ready to use DIM-Analog® Model, consisting of the printed model, the DIM-Analog® and one or more flexible gingival masks.

INFINIDENT

SOLUTIONS

"The partnership with NT-Dental opens another path for our customers for a truly open digital workflow from the digital impression to the final product. NT-Dental has a comprehensive portfolio of solutions for dental and practice laboratories and is therefore the perfect complement to our independent digital technology center" explains Thomas Hack, Managing Partner of INFINIDENT Solutions GmbH.

The model data is provided as an STL file from the model software of e.g. exocad, 3Shape, inLab or Dental Wings. For exocad and 3Shape, NT-Dental also offers open and free libraries for the use of the DIM-Analog® for printed models for download.

For more information about the partnership and the benefits of the NT-Dental DIM-Analog® contact INFINIDENT's Dental Technology Support at +49 (0) 6151 3961818 or visit infinidentsolutions.com.

About INFINIDENT

INFINIDENT Solutions GmbH is the central industry- and system-independent CAD/CAM service partner for dental and practice laboratories in Europe. Through a 24-hour production process, labs get simple, fast and cost-effective access to an industrially produced dental prosthesis. With cutting-edge CAD/CAM technologies and validated processes, INFINIDENT Solutions GmbH produces solutions for restorations, working models, removable dental prostheses and provision of implant works. As a former subsidiary of Dentsply Sirona, INFINIDENT Solutions competence is rooted in more than 30 years of dental CAD/CAM experience.

INFINIDENT Solutions is a validated “Authorized Milling Partner” of Ivoclar Vivadent, an “Authorized Milling Center” of VITA Zahnfabrik, and a “Preferred Partner” of Dentsply Sirona, and is certified according to DIN ISO 13485:2016.
