

# INFINIDENT

SOLUTIONS

## Lab Model IMPLANT/ IMPLANT st

High quality work models for use  
with model analogs

**Lab Model  
IMPLANT/  
IMPLANT st**

Order Number 001-7728EN

## **INDICATIONS**

As a basis for implant-supported restorations from intraoral scan data.

## **BENEFITS**

- + Sturdier than plaster models
- + For use with the approved laboratory analogue of the respective manufacturer
- + Includes removable gum mask (made of solid acrylic), with Lab Model IMPLANT st also with flexible gum mask (extra fee)

## **REFERENCES**

With the help of Lab Model IMPLANT, physical working models made of acrylic resin can be converted directly from STL data\* of your model builder software on the basis of the digital impression data. Suitable articulator interfaces, e.g. 3Shape, iTero or Dentsply, will be implemented according to your data.

Note: The model analogs are not included.

\* Please note the applicable design specifications.
