

INFINIDENT

SOLUTIONS

Ultaire® AKP

The metal-free alternative for removable partial prostheses

FLEXURAL STRENGTH*

148 MPa

E-MODULE*

3,500 MPa

INDICATIONS

As basis for removable partial prostheses.

ADVANTAGES

- + Bio-compatible
- + Low weight
- + More aesthetic than metal-based prostheses

NOTES

Ultaire® AKP is an innovative polymer material specially developed for dentistry and closes the gap between partial prostheses made out of metal and those made out of plastic, which is only suitable for interim care. Further processing occurs according to the instructions for using Ultaire® AKP.

Note: Design is performed using 3Shape or exocad CAD software. The laboratory requires special training and approval from Solvay Dental 360®. INFINIDENT is a certified design and manufacturing partner of Solvay Dental 360®.
